

## 2019 Echo360

# Research Champion Grant

## Focus Area: Automatic Speech Recognition (ASR) Accuracy

As part of the Echo360 research grant program, additional grants have been established to study the accuracy of the Echo360 transcription service built with Amazon Transcribe from Amazon Web Services (AWS).

Research Champions studying ASR accuracy will be supported through a range of activities including:

- ✓ Grant funding of \$5,000 (USD) to subsidize current research or for new research projects.
- ✓ Funding up to \$1,000 (USD) to attend an Echo360 sponsored event.
- ✓ Regular checkpoint meetings to communicate progress and get support as needed.
- ✓ Presentation of research findings at Echo360 user conferences, tradeshows and webinars throughout the year.
- ✓ Opportunities to participate in blog articles, press releases, media interviews, video and case studies.
